

FLOATS

The Trabucco catalogue floats section is a wide-angle shot showing how our Company is deeply involved in every aspect of fishing. You can find Hi Tech floats for competition and very good quality floats for passionate anglers, and they can be used both in fresh and salt water. The assortment is also rich of floats that can be used in combination with a chemical light. You cannot do without them if you are fishing in salt water or in carp fisheries night competitions.

Proudly made in Italy with high quality materials, the new range of GNT floats has been developed for the advanced match angler, with shapes, sizes, components and details widely tested through the personal experience of Maurizio Fedeli and Luigi Sorti. In the Italian scenario, the growing importance of Bream has matured a higher attention to the rig's structure and, inevitably, to the float's sensitivity as well. Such strong specialization has contaminated the commercial carp environment, where the bad manners are rapidly disappearing for evident inferiority. These phenomena have inspired the design of the new series, up to characterize them one by one with a precise mark.

NEW GNT 1

The slim teardrop shaped body, with low centre, suggests that it's destined to still or slow moving waters, even if shaken by wind. The smaller sizes are perfect for shallow fishing, or for scratching the canal's margin in those tough days.

NEW GNT 5

A classic allrounder for variable speed's waters, like some canals and drains which can require a light control of the rig's walk or a strong hold during the same fishing session. To this purpose, the long wire stem is a nice benefit, as it adds stability to the lot.

NEW GNT 6

Ultralight and compact, this float has been developed for tough fishing in shallow running waters, where maggot's loosefeeding is the key to success. It works wonder with spread split shot rig, for the most natural presentation.

NEW GNT 7

A fantastic egg shape which doesn't fear any difficult conditions and "does the job by itself", as it doesn't require that much control to be consistently efficient. On top of that, when the fish needs to be stimulated by gentle side traction, the float allows it very well.

PLASTIC CARBON

NEW GNT8

It's perfect to target big fish with light rigs and thick lines, because the line gets through the body, always working in a straight row. Therefore, the metal ring absorbs the strike stress, while the inner rubber tube protects the body from cutting.

SUPREME SAIL

The slimmest flat float in the world performs brilliantly thanks to its narrow profile, which gets the minimum pressure from the water when it's hold dead still. Beyond the slimmness, the body perimeter is well sharpened to let water run smoothly along its sides. The result is a very stable, vibration free float which enables to use a 20-30% lighter rig compared to traditional flat floats

CARP BLUE

A new generation of unbreakable pole floats, mainly destined to commercial lakes (carpodrome) as they can bear extreme pressure as well as any accidental shock. Their body is made from EVA (Ethilene Vinyl Acetate), an artificial material with a sponge-like structure which line can't cut. Having no metal eye, the rig line is completely straight, thus free from any damage.
